# testo Saveris 1 software

In the testo Saveris 1 software, all measurement data is collated, visualized and documented without interruptions.

## Benefits

**User-friendliness**

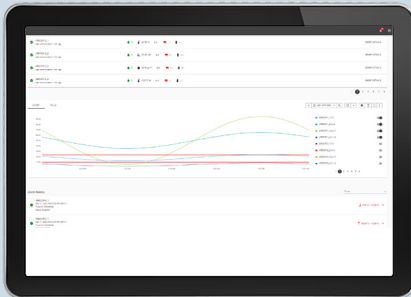

**Graphical representation**

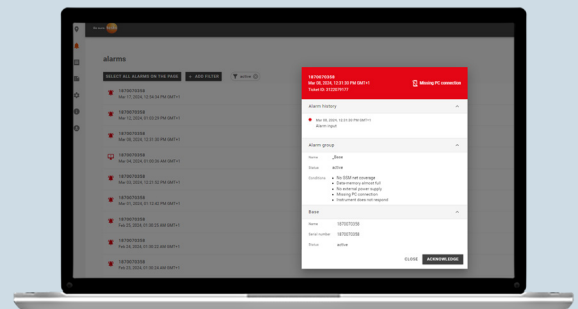

**Alerts**

**Reporting**

## User-friendliness

- Easy and intuitive, platform-independent user interface
- Recorded measurement data is automatically centrally archived and securely stored by the software
- User management and location management with role access
- Easy installation

## Graphical representation

- Graphic and tabular display of measurement data
- Geographical hierarchical structure of a complex system of many measuring points
- Individualization of the system through integration of own floor plans and logos

## Alarms

- Alarm notification with SMS / e-mails
- Individual and detailed alarm management with escalation levels
- Freely configurable alarms and alarm forwarding
- Easy and location-independent access to measurement data and alarm acknowledgement via mobile end devices

## Reporting

- Report templates and individual configuration
- Reporting incl. signature and release regulation

## Additional functions:

### testo Saveris 1 CFR software

- Extended flexible user management
- Audit trail in accordance with 21 CFR Part 11 and EU Annex 11 of the GMP regulations

### API interface

- Extended possibility of data integration into an external system via testo Saveris 1 REST API
