Testo Industrial Services – International full service provider

**Testo Industrial Services** – More assurance, better service.

# International full service provider

Testo Industrial Services – Calibration, validation, training

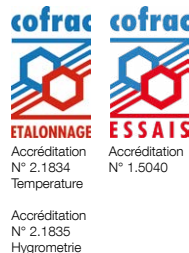

Testo industrial services GmbH is a leading service provider company in the field of calibration, qualification, validation as well as test equipment management. Our laboratories, which are accredited for more than 190 calibration procedures are worldwide unique. Being a 100% subsidiary of the Testo AG, one of the worldwide largest manufacturers of measuring instruments, we have over 50 years of experience in the field of measurement technique. Testo Industrial Services has subsidiaries in Spain, Switzerland, France and Austria and employs more than 700 employees within Europe. Company philosophy and driver of innovation is the continuous orientation on the requirements of the customers. Because of that, the portfolio is enlarging constantly. The services provided by Testo industrial services GmbH are relevant for all sectors of industry, in which quality assurance has high priority and gets controlled by standards and guidelines – from the production to the consumer. Due to specific rules, in each sector different services are requested. For sectors regulated by GxP these services are qualification, validation and calibration. For ISO9001 – or ISO-TS-certified sectors the focus is on the calibration as well as well as a comprehensive test equipment management.

## Your benefits

- Standard compliant calibration, validation and qualification services (e.g. the ISO 9001 regulations, ISO TS 16949, GMP, HACCP)
- Audit security
- Increase of the product and process quality
- Protection against any claims for compensation
- Everything from one hand -> Manufacturer, procedural and process-independent!

## Why Testo Industrial Services?

- Leading European service provider in the field of calibration, validation and qualification, with many years of experience
- Accredited for more than 190 calibration procedures according to DIN EN ISO/IEC 17025
- Manufacturer, procedural and process-independent
- Highly qualified and motivated partner for all questions relating to quality assurance
- Individual and flexible cooperation
  - Projects
  - Qualified personal support (temporarily and permanently)
  - Consulting
- Global network of Testo Industrial Services and Testo subsidiaries
- Laboratory and on site services
- A worldwide unique combination of services and accreditation
