

Pharma Solution testo Saveris 1 V6

Future-proof system solutions – centrally conceived, decentrally implemented

The testo Saveris 1 Software V6 provides companies with a powerful tool for centralized control, monitoring and analysis of their measurement and system data.

The intuitive user interface, modern database structure and granularly configurable rights management enable efficient processes with maximum security – regardless of industry

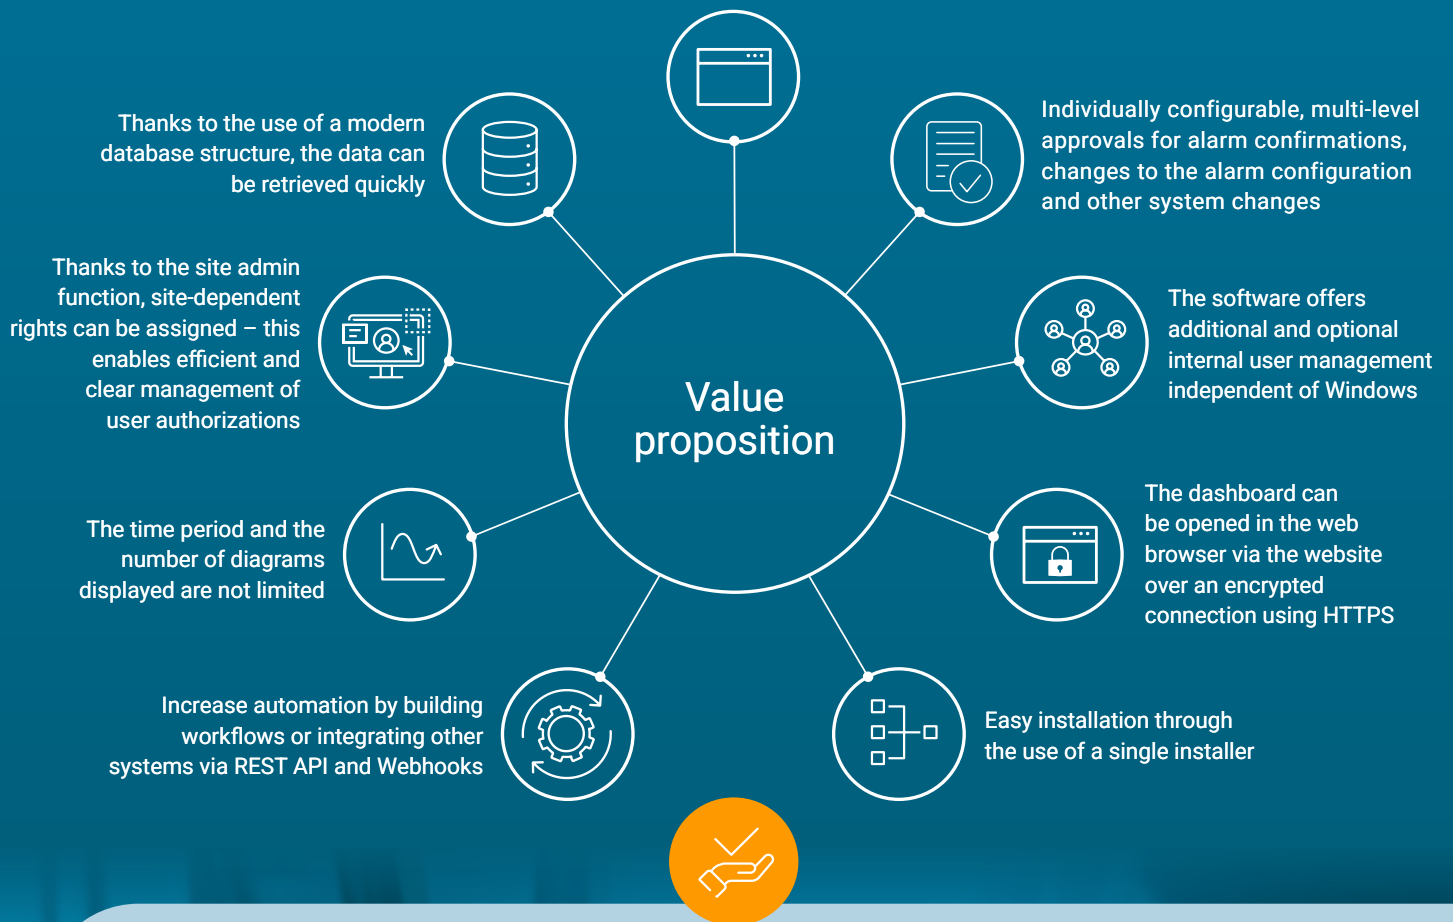

or site size. Modular functions such as site management, automated reports, flexible alerting and open interfaces allow the software to be customized precisely to individual requirements. This allows you to maintain control at all times – from the dashboard to mobile device integration.

testo Saveris 1 V6 – your solution for smart system management.

Centralized management, simple operation

Two standardized UIs are available for
system administration and configurations:
testo Saveris 1 Editor and testo Saveris 1 Web Interface.

Our continuous further developments ensure stability, security and compliance as well as regular new features!

Flexible deployment, reliable performance: On-premises or in the Testo-hosted cloud

testo Saveris 1 gives you the freedom to choose exactly the server location model that best suits your company. Whether you run the system locally in your own infrastructure or use the testo-hosted cloud – in both cases you'll benefit from a powerful solution for central monitoring, secure data processing and efficient system management.

System validation – independent of server location

On-premises

(local operation)

- **Operating the application is entirely your responsibility** – managed by your IT
- **Updates, maintenance and backups** are carried out by your IT according to your internal processes
- **Full control over the update timing:** You decide when to install an update.
- **Data sovereignty:** Your data remain at all times in your possession and under your control

Cloud

(Testo Cloud platform)

- **Hosting on the Testo Cloud Platform**
- **Full application operations** managed by Testo
- **Automatic updates, maintenance and backups** fully by Testo
- **Version freeze (patent pending) for validated systems**
- **Transparent costs:** No hidden fees
- **Hosting in the EU** (Server location EU)
- **Data sovereignty:** Your data stays in your possession and under your control

One software solution – two operating models

Whether on-premises or in the testo Cloud, testo Saveris 1 offers the same powerful foundation for centralised monitoring, efficient system management and secure data processing in both variants. Stay flexible and choose exactly the operating model that best suits your company.

Systematic user and role management

Visualization & analysis made easy

Unlimited time frame and number of diagrams.

Customizable time frames for graphs, reports, alarms and audit trails (date and time)

Fast retrieval of data and diagrams from the past thanks to improved database structure

Filter and sorting options available for audit trail entries, logger views, users, alarms, etc.

Activated and deactivated alarm groups clearly marked in the UI
– for maximum overview

Alarms that arrive – reliably and flexibly

Alarm notifications, for example SMS, e-mail, alarm lamp, Teams message, relay

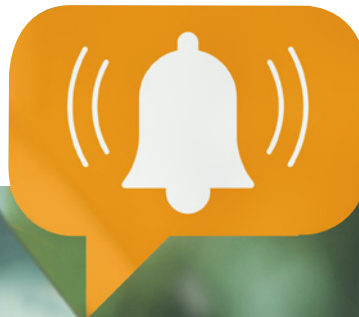

Individual alarm management with escalation levels

Freely configurable alarms and alarm forwarding

Easy, location-independent access to measurement data and alarm acknowledgement via mobile end devices

Decentralized site management concept

Administrator per site:
Responsible for rights and access authorization at his/her location/site

Decentralized management:
Efficient, local management of resources and user rights by site administrators

Flexibility in assigning rights:
Reduced workload for the system administrator and adaptation to site requirements

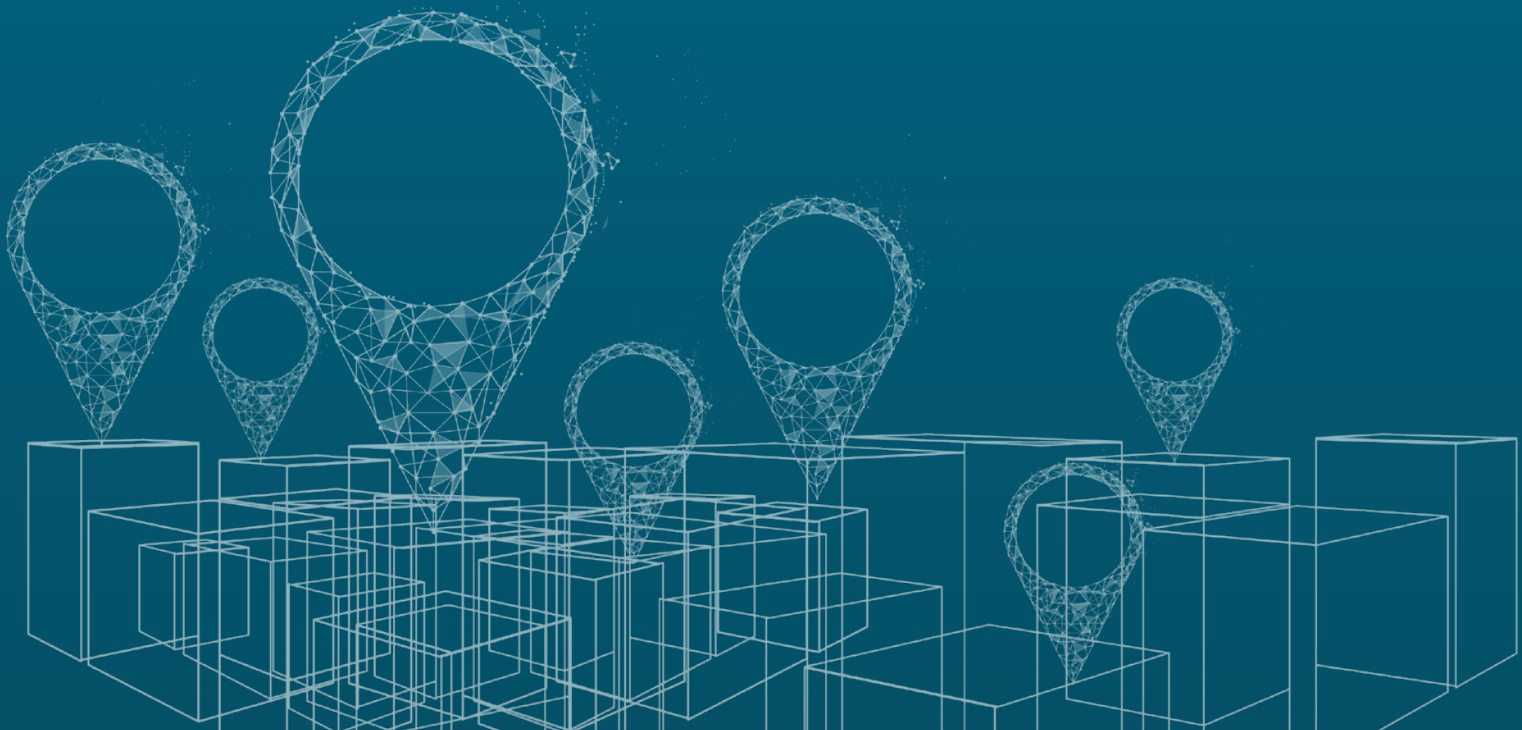

Optimized workflows:
Efficient processing and management for a well-organized environment

Granular access control:
Role-based access restriction to increase data security and integrity

Multi Level Approvals:
Ensures that no system changes can be made without being reviewed

Reports with informative value – immediately and automatically

Report sources: Complete system report

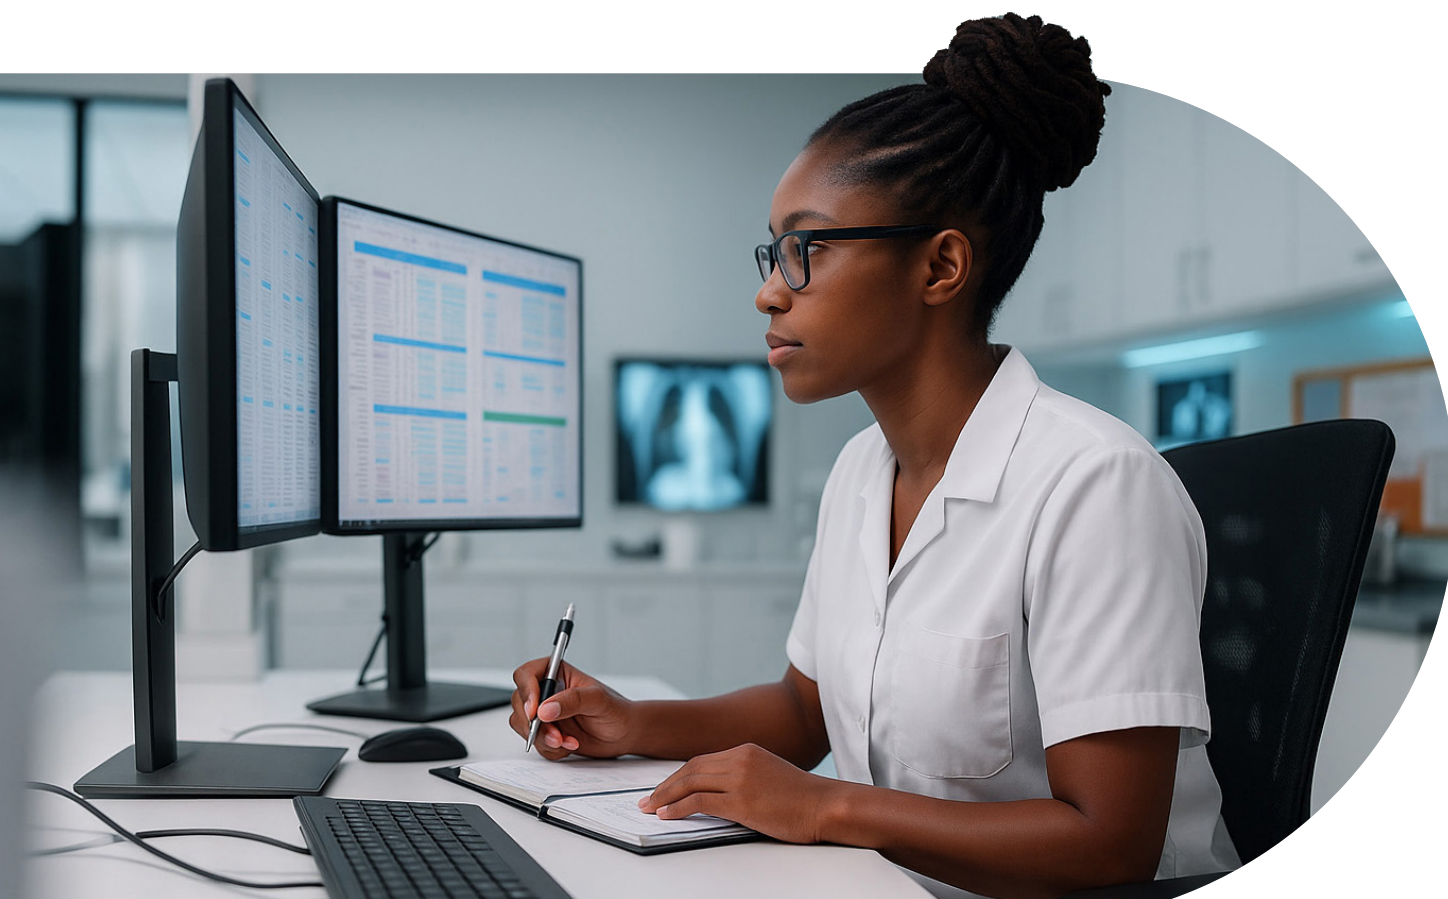

Electronic signature workflow
Digital signing of reports with role-dependent authorization

Automatic and immediate reports

Overview of generated reports:
Intuitive and clear listing with comprehensive filter options

One installer

– many possibilities

Device and component view

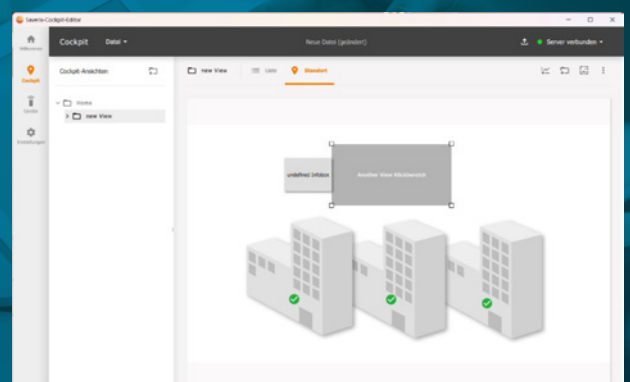

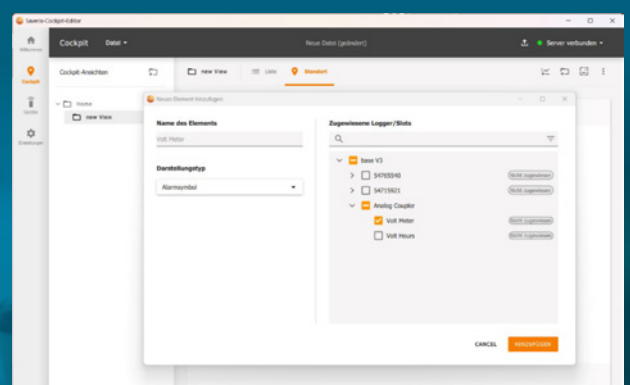

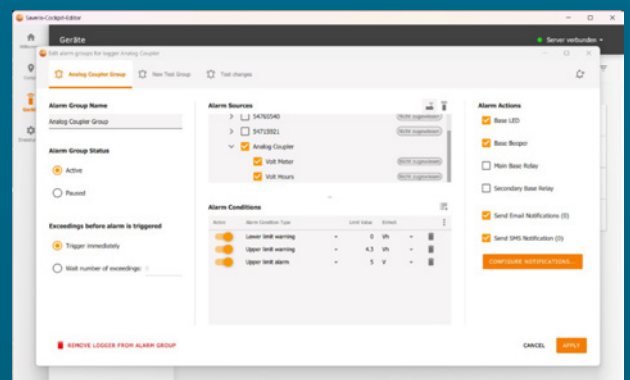

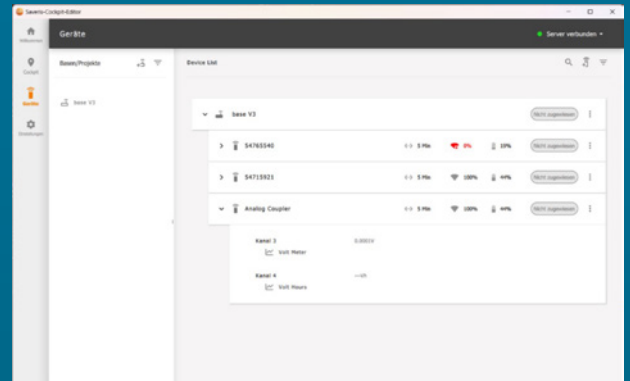

Authorization and access management

Alarm management

Floor plan planning and component allocation

Seamless integration into existing systems

Open interface to integrate data from testo Saveris 1 into your systems

Connect testo Saveris 1 to building management systems (BMS) or integrate the measurement data into your LIMS

Detailed information about a channel and the sensors connected to it

Measured values for a channel in a specific, freely selectable time interval

Alarms (active & unacknowledged) and general instrument information such as serial number and name and ID

Build Workflows to automatically execute define actions like sending data to your BMS or LIMS

Reliability that grows with you

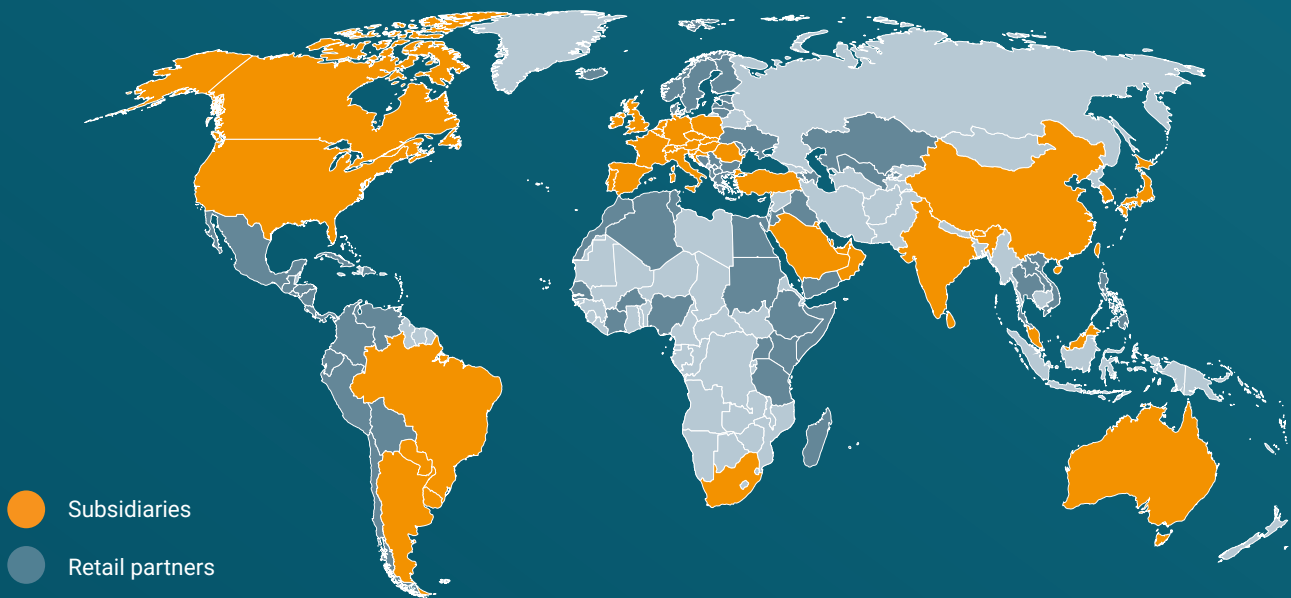

testo Saveris 1 software V6 offers you the flexibility, security and overview that modern system environments require. Intuitive operation, secure user and site management as well as open interfaces allow you to integrate our solution seamlessly into your infrastructure.

Discover how you can simplify processes, minimize risks and gain digital control with testo Saveris 1.

High-tech from Germany's Black Forest.

World market leader
in the measurement
technology sector

For over 65 years, Testo has been known for creating innovative measuring solutions made in Germany. As a world market leader in portable and stationary measuring technology, we help our customers to save time and resources, protect the environment and people's health and improve the quality of goods and services. More than 4000 employees work in research, development, production and marketing for the high-tech company in 37 subsidiaries all over the world. Testo provides more than 1 million customers around the globe with high-precision measuring instruments and innovative solutions for the

measurement data management systems of the future. An average annual growth rate of roughly 10% since the company's foundation in 1957 and a current turnover of just short of 466.5 million Euros impressively demonstrate that southern Germany and high-tech systems go hand in hand. The above-average investments in the future of the company are also a part of Testo's recipe for success. Testo invests about a tenth of annual turnover in research and development.
